• Dance every Saturday night • friendly atmosphere • dance floor etiquette •

Learn line dancing with Mac & Jackie

Beginner classes

Tuesday & Friday
7 to 8:30

Frequent review
Written dance descriptions
Friendly, patient atmosphere
Partner not needed, singles welcome

Next new series begins
Friday, October 6

\$4.00 per class or 10 classes for \$35

Robert Royston

teaching

West Coast Swing Class Series

4 classes • Starts Wednesday, Sept. 6
Beg. Level 2 - 7 to 8:30 • Int. Level 1 - 8:30 to 10
\$20 per person for series

Two Step Class Series

3 classes • Starts Thursday, Sept. 7
Easy Inter. - 7 to 8:30 • Inter/Adv. - 8:30 to 10
\$15 per person for series

- Register for the entire series and Save. Each week's lesson builds on previous week.
- If you do not have a partner, come the first night and we will try to match up singles.
- You may bring a video camera.

All classes are \$7 if you pay by the class.

Drop in Line Dance Lessons with Mac & Jackie

Monday, Tuesday, and Friday

New lesson, plus review of previous dances.
Free written dance descriptions.

\$4.00 or 10 lesson card for \$35.00

On the road again...

It's time again for our yearly RV trip to Arizona. We'll be gone Sept. 10 — 23. Julie Hughes, Linda Oleson and Gerry Cooke will teach the line dance lessons for us. Be good for them.

Thanks,
Mac & Jackie

San Leandro Computer Club

P.O. Box 1506
San Leandro, CA 94577-0374

An independent money losing organization of Atari Computer users. Membership at \$20, doesn't buy you a whole lot, but the price has never been raised. Call a officer to join.

Club Officers:

President	Robbie Bridges	(510)797-5636

September Minutes or Something

Many good things happened during September and as usual some really lousy things, with a change of format we will report some of these important facts. First and foremost the regular meeting went off as scheduled at 8:00 PM on the first Tuesday, we even met in our regular Estudillo room. President Robbie Bridges did all the honors.

The high light of the meeting was of course the Auction of much old hardware and software. The bulk of this sort of, kind of, priceless stuff was won(?) By an enterprising young man who hand cuffed that guy from Alameda to keep him quiet and then sat on him while the Auction was held. (Sharon Woolley will be delighted)

Our resident Dirty Old Man gave his usual preview of the 8 Bit floppy along with a demonstration of some of the better programs. For those that can read there is a complete report in the Journal.

The resident game cheat reported that Atari had released the Jaguar CD ROM on August 24th, with 3 CD disks, it sells for about \$150 dollars. Just to show how important this bit of news was, Atari stock jumped over half a point when word was passed by them that this first run of CD ROM's had sold out by mid September. (Rumor has it that there were at least two boxes of CD's in that first batch.) Remember back a couple of years ago when the CD ROM was to be released for the ST but was canceled when they couldn't get the price below \$600 dollars. Time's sure have changed!

The ST/PC meeting was held on the 18th with President Bridges almost having a heart attack when Earl Lyle Earl showed up for the meeting. (We had been told they were going to keep him in Georgia, permanently. By the way the Tar and Feathers hardly even showed.) Other than that little disappointment the rest of the meeting went along very well. Earl William's has started to make up disks of the month for the PC, hopefully the start of something good.

Everyone not attending that meeting really missed a big deal, ask Robbie about the bean problem. By the way remember when we warned all of you about one of our past presidents big spending ways? Now that we are dirt poor he won't even show up for meetings. Boy, some guys.

Can't think of anybody else to pick on so will close for a while.

Jim Moran - Secretary

OUR LATEST 8-BIT D.O.M.

By Bob Scholar SLCC 8-bit Software Chairman

SLCC1310.DOC
OCTOBER 1995

GENERAL COMMENTS

Our 8-bit Library disk (#0-PR) is being updated thru 10/1995. Our last one went thru June 1994. The printout version (see Glenn Fowler to read it) will soon have three new pages.

D.O.M. SUMMARY

The back of this disk features 9 "Earth Science" EDUcat'l. programs by Peter Loeser- surprisingly up to date considering that they were written in 1985 (from Bellcom). It also has one UTILITY. On the front are 3 Games, 1 DEMO, 1 UTIL, & 1 Music/EDU program.

CONTENTS- DISK #1310:-

Front:- Boot with BASIC!

PROGRAM DETAILS

BANJO.BAS from ANTIC 12/84, is by Richard Lindgren. Use the keyboard to play 11 different 8-note patterns for 13 chords. An on-screen diagram tells you that 1,2,3,4,Q,W,E,R,A,S,D,F,Z,X,C, & V keys play chords; and 7,8,9,0,U,I,O,P,J,K, & L play 8-note picking patterns. [OPTION]/[SELECT] speed up & slow down. [START] will Start/stop. Look it up for more information.

CARDEMO is a short DEMO of a four cylinder motor and car (a Porsche??).

It's from Steve Hoffee of LAPD (LAKE ALMANOR PD). For best results run it without BASIC (use DOS "L"). Note the cylinder color changes in the cycle.

EASYFIND is a DB program for easy retrieval of text- you create records with any word processor! I wrote the EASYFIND.DOC to explain its features, & use. It's by Jim Siemion; from the 5/87 ANALOG (#54).

EXTEND.BAS creates an alternative DIRectory (EXTDIRNM.DAT) on the disk. It allows filenames of 30 characters, of any type (Nos., blanks, etc.). It RUNs BASIC files with one key stroke. BINARY files also display- but do not RUN. Copy it to another disk; RUN it, and follow the prompts. From ANALOG #27 (2/85) by Roland S. Chan. It's on the back of this disk (it has no *).

ROULETTE is by Michael Pemberton, from ANTIC 2/89. It's the best one I have seen. You place bets (11 kinds) just as if you were in a casino; then press [START] to spin the wheel. The prompts/comments are quite clear.

SAB.BAS:- a J.R. Payne Game, with instructions. It's a J/S workout!

SAUCER.BAS- is a straight-forward shoot-em-up by James Catalano, from ANTIC (1/89). Your launcher has only fifty missiles to fire. You score 100 points for every saucer you hit, plus a 1000 points bonus every five. Move the launcher left and right with your Joy/Stick. You can only hit a saucer when it's directly above the launcher (it turns white). The Game ends when all missiles are fired

The group of EDUcational programs on the back of this disk, is from the Bellcom library. They're called ES1 (Earth Sciences #1)- & all are marked with a *. To RUN them, boot the back with BASIC; or use FULMENU to RUN the BASIC program SCIMENU.SYS. All files have been made Non-Listable!! A fine geological & paleological exercise!
